1 Course Details

1.1 Calendar Description
This course examines the nature of Mendelian inheritance when extended to quantitative traits that are jointly influenced by the environment and the simultaneous segregation of many genes. Prediction of response to natural and artificial selection in populations will also be studied.

Pre-Requisites: MBG*2400, 0.50 credits in statistics.

1.2 Course Description
Quantitative Genetics is not a new subject by any means. With the rediscovery of Mendel's work in the early 1900's, geneticists started to try to figure out why they observed similarities and differences in populations of plants and animals, both in simple characteristics like coat colour, seed colour etc and complex characteristics like size, growth, drought tolerance, temperament, speed and strength. Since no tools existed to study this, they invented them and many early quantitative geneticists were also very good statisticians. Along the way, as quantitative geneticists figured out alleles, genetic variation and selection response, new fields of genetics were spawned - population genetics and evolutionary genetics. But Quantitative Genetics is the grandparent of them all.

So why the heck are we devoting a whole course to dusty theory that is over 100 years old? Because it isn't dusty! Early quantitative geneticists figured out a lot of stuff without the benefit of all of the molecular genetics tools and techniques we have now. And it turns out they got it right! So now that the molecular geneticists are catching up to us, we have an extensive toolkit of methods to figure out what the molecular labs are puzzling over. So welcome to the new old subject of Quantitative Genetics.

1.3 Timetable
At the time of writing classes will be virtual until January 24, 2022, after that lectures will be in
Rozanski Hall, Rm 101 (ROZH 101) unless restrictions continue. Classes are scheduled Monday, Wednesday and Friday 2:30 to 3:20 p.m. Virtual classes will be presented using Zoom with screen annotations and other real-time activities with a live transcript but will also be recorded if you prefer to access them at a different time. If / when in-person classes resume on Jan 24, classes will continue in a hybrid format with the in-person lecture in the classroom and the simulcast with Zoom including screen annotations, live transcript and recording. In other words, Zoom live and recorded classes will be available all semester, not just for the first two weeks and once in-person lectures resume, students have the option of in-person attendance or Zoom live attendance or Zoom recording or any combination of those.

1.4 Final Exam

Final exam Wednesday April 20, 2022 11:30AM - 1:30PM. At the time of writing the exam will be offered in two formats The "official exam" is an in-person, on-campus, closed-book exam, room location TBA. Since the rest of the course can be done online, the plan is to offer an online option for the final exam using the Respondus lockdown browser and webcam for this optional format of the final exam administered through Courselink. A practice quiz will be available on Courselink for you to test Respondus with your technology well in advance of the exam. There will be a quiz to sign up for your preferred exam format. Students who do not complete that exam format selection quiz will be assumed to have selected the in-person official final exam.

2 Instructional Support

2.1 Instructional Support Team

Instructor: Andy Robinson  
Email: mbg3060@uoguelph.ca  
Telephone: +1-519-824-4120 x53679  
Office: ANNU 122  
Office Hours: Office hours will be virtual all semester via Zoom. Links will be posted on Courselink. Mondays 3:30pm (after class) until 5:00pm. Why only Mondays? Weekly quizzes typically open on Sundays and are due the following Monday night. So Monday office hours are perfectly placed to give you a chance to ask about the new quiz due next week and/or the quiz that is due that night.

2.2 Teaching Assistants

Teaching Assistant (GTA): Shannon Beard  
Email: sbeard@uoguelph.ca  
Teaching Assistant (GTA): Nicole Berdusco  
Email: berduscn@uoguelph.ca  
Teaching Assistant (GTA): Olivia Willoughby  
Email: owilloug@uoguelph.ca
3 Learning Resources

3.1 Additional Resources

Course Notes (Notes)
There is no textbook officially for this course. The primary source of reference material for the course is the lecture slides posted on CourseLink.

The presentation of the course material generally follows the notation and approach in the landmark textbook "Introduction to Quantitative Genetics" by Douglas Falconer originally published in 1962 and available still from Pearson Publishing with Trudy McKay as co-author on more recent editions (retail price is around $100 on amazon.ca). Falconer’s book was itself based on over 50 years of various folks teaching quantitative genetics with strong ties to Prof. J.L. Lush and others at Iowa State University. Throughout the world, this is the de facto standard way of presenting this material and Falconer’s book has been translated into many, many languages.

Recorded lectures will be available through Zoom including the screen annotations added during the presentation. Sporadically, links to relevant information from the media or scientific literature to provide background on topics we discuss in class will be posted on CourseLink also.

3.2 Course Technology and Technical Support

CourseLink
This course is being offered using CourseLink (powered by D2L’s Brightspace), the University of Guelph’s online learning management system (LMS). By using this service, you agree to comply with the University of Guelph’s Access and Privacy Guidelines. Please visit the D2L website to review the Brightspace privacy statement and Brightspace Learning Environment web accessibility standards.
http://www.uoguelph.ca/web/privacy/ https://www.d2l.com/legal/privacy/
https://www.d2l.com/accessibility/standards/

Technical Support
If you need any assistance with the software tools or the CourseLink website, contact CourseLink Support.
Email: courselsink@uoguelph.ca
Tel: 519-824-4120 ext. 56939 Toll-Free (CAN/USA): 1-866-275-1478
Support Hours (Eastern Time):
Monday thru Friday: 8:30 am–8:30 pm, Saturday: 10:00 am–4:00 pm, Sunday: 12:00 pm–6:00 pm. Note that extended support hours are often available during final exams.

Zoom
This course will use Zoom for synchronous online virtual classes. Check your system requirements to ensure you will be able to participate.
https://opened.uoguelph.ca/student-resources/system-and-software-requirements

3.2 Technical Skills

As part of your learning experience, you are expected to use a variety of technologies for assignments, lectures, teamwork, and meetings. In order to be successful in this course you will need to have the following technical skills:

- Manage files and folders on your computer (e.g., save, name, copy, backup, rename, delete, and check properties);
- Install software, security, and virus protection;
- Use office applications (e.g., Word, PowerPoint, Excel, or similar) to create documents;
- Be comfortable uploading and downloading saved files;
- Communicate using email (e.g., create, receive, reply, print, send, download, and open attachments);
- Navigate the CourseLink learning environment and use the essential tools, such as Quizzes, Discussions, and Grades (the instructions for this are given in Courselink help);
- Access, navigate, and search the Internet using a web browser (e.g., Firefox, Chrome, Safari etc);
- Perform online research using various search engines (e.g., Google) and library databases; and
- Interact with your fellow learners, teaching assistants and instructors using online tools such as Microsoft Teams and Zoom with and without the use of a webcam and microphone.

----------------------------------------------------------------------------------------------------------------

4 Learning Outcomes

4.1 Course Learning Outcomes

By the end of this course, you should be able to:
1. Analyze how allele frequency can fluctuate within a population over time, describe factors that affect these fluctuations and analyze how these factors affect genetic variation
2. Estimate levels of genetic variation within a population and demonstrate how that
variation may be exploited to make genetic change in populations over time
3. Demonstrate how an individual locus can contribute to quantitative genetic variation involving many loci in the same individual or in many individuals in the population
4. Demonstrate how genetic variation can be gained or lost through selection of mates, combining different populations and other mechanisms
5. Demonstrate why the mating of close relatives leads to a loss of genetic variation and how to recover lost genetic variation

4.2 Overall Course Learning Outcome

Genetic variation is the engine that drives natural and artificial selection. Quantitative Genetics focuses on quantifying and measuring characteristics about animals called traits and variation in those traits. By the end of this course, you will be able to think like a quantitative geneticist and analyze and quantify genetic variation, showing how it can be influenced and manipulated, both by natural and artificial means.

5 Teaching and Learning Activities

5.1 Topic Schedule

As noted lectures will be live and recorded via Zoom. Zoom recordings typically show up on CourseLink within a day after the class. The list of planned lecture topics is shown below. Actual topics and dates may deviate from the plan depending on the pace through the material and potential changes to scheduling by the university due to changes to the pandemic restrictions. In other words, this is a best guess based on what is known when the outline is being created.

6.2 Assessment Details

**Weekly CourseLink Quizzes (36%)**

- **Date:** See CourseLink or Course Activities, Online
- **Learning Outcome:** 1, 2, 3, 4, 5

Weekly Quizzes - 10 in total, 4 points each, **lowest grade is dropped**. Quizzes are generally due **Monday night** but check CourseLink for the deadlines for all of the quizzes, especially the Selection and Makeup Quizzes.

**Graded Quizzes**

The quizzes are scheduled weekly (consult course activites for the overall schedule and CourseLink for the deadline dates). Each weekly quiz generally has 15 questions; the first 10 questions follow the practice quizzes (see below) and the final 5 questions explore concepts that integrate the topics covered in the quiz with previous topics and relate quantitative genetic theory to practical applications. There are 9 weekly quizzes throughout the semester (appropriately called Quiz 1 to Quiz 9) and a Makeup Quiz at the end of the semester for a total of 10 quizzes and the **best 9 quiz grades** will be used for your final grade. Please note that the Selection Quiz is not part of this “best 9” system.

Each weekly quiz (Quizzes 1-9) is open for 8 days from Sunday morning to the following **Monday at 11:59 p.m.** and is due when the quiz module closes at 11:59 p.m. on the due date. There is no time limit, just a final quiz deadline. During these 8 days, you can re-open and re-enter the quiz as often as you like until you submit it. With this system, there is **no opportunity for late quiz submission** because the answers are released when the quiz closes. If you are registered with SAS, since the quizzes are open for 8 days giving you about 180 hours to complete the quiz, your regular quiz and exam accommodations are not needed.

The **Selection Quiz** and the **Makeup Quiz** have a **2-week availability** and different deadlines.

As a safety net, you have 2 attempts for each quiz. You will know the grade on your first attempt but you won’t know the answers if you choose to make a second attempt. The extra attempt is there should you wish to retry a quiz and CourseLink will keep the highest of the two grades.

Should it happen that you are unable to complete your quiz on time due to circumstances warranting academic consideration, **complete the academic consideration request form** found on the CoursesLink site and contact the instructor by e-mail (mbg3060@uoguelph.ca) to request academic consideration. There is a form because students often forget to provide enough detail to for the instructor to figure out what assessment(s) is/are affected so the form just helps ensure the information needed to consider requests is all there. If you have a bad week, the Makeup Quiz is available at the end of the semester as a safety net to replace one quiz. There is no weekly quiz starting the week of the midterm quiz or
due over Reading Week. The Selection Quiz is a special quiz covering the very important topic of selection and is designed to review all the types of selection we cover throughout the semester.

The **Selection Quiz is mandatory** and is not part of the "best 9" option described above and it doesn’t have a practice quiz but since it covers all different aspects of selection you have already had practice questions on all the aspects covered.

**Practice Quizzes**

Each of the 9 weekly quizzes for credit has a matching practice quiz. You have unlimited attempts for the practice quizzes and the question feedback has been specially designed to assist you in understanding the material covered by each question. The practice quizzes remain open for the entire semester so you can use them to review for the midterm and final exams as well. Each practice quiz typically contains 10 questions and many of the quizzes have randomized elements to provide variety and new learning experiences with each attempt. The quizzes for credit may also draw from questions you might see on a practice quiz. Please note there are no practice quizzes for the Makeup Quiz and the Selection Quiz since those quizzes review material covered throughout the semester so you have already been practicing for those quizzes.

**Review Quiz**

There is an additional practice quiz at the beginning of the semester that you can use to review the material from MBG-2400 since it could be at least a year since you have had any exposure to that material. This quiz is purely for your use to recall / review material that was covered in MBG-2400. You will encounter this material again in greater detail and more advanced levels in MBG-3060 so if it fits your study preferences, the review may help reawaken the brain cells that contain this material from MBG-2400.

**Selection Quiz (4%)**

Date: See CourseLink or course activities, Online  
**Learning Outcome:** 1, 4, 5  
This quiz is separate from the weekly quizzes and cannot be dropped as part of the "best 9 quizzes" system described above.

**Online Midterm Quiz (15%)**

Date: Week 6, Online  
**Learning Outcome:** 1, 2, 3, 4  
The online midterm quiz is available between 12:01am Thursday February 17 to 11:59pm on Friday February 18.

The midterm quiz is time-limited, once you open the midterm quiz, you have **3 hours in which to complete the 60 questions**. The midterm quiz is more like a real midterm than the weekly quizzes so unlike the weekly quizzes, you have **one attempt** at the midterm quiz and the grade will not be released until after the availability period ends. You have a span of 2 days in which to do the midterm, don’t leave it to the last minute. If you are unable to complete the online midterm quiz and wish to request academic consideration, complete
the academic consideration request form for this course and contact the instructor as soon as possible. If you are registered with SAS and are given accommodations on exams, your accommodations will automatically be set. If you do not see your SAS accommodations set when the midterm becomes available (a day or so before it opens), it probably means your accommodations have changed and are not in the system yet so email the instructor (mbg3060@uoguelph.ca) with a CC to your SAS advisor.

Final Exam (45%)
Date: Wed, Apr 20, 11:30 AM - 1:30 PM, In-person exam location TBA
Learning Outcome: 1, 2, 3, 4, 5
The officially scheduled final exam is an in-person exam in a room location on campus yet to be announced. However, since the rest of the course can be completed online, there is an optional format online final exam using the Respondus lockdown browser and webcam. There will be a practice quiz on CourseLink for you to test your system with Respondus in advance of the Final Exam so you can ensure your technology is ready for the exam. Note that some Chromebooks are known to have trouble with Respondus so if your Chromebook does not work with Respondus in accordance with the course technology policy (see below) you will need to find an alternative device or complete the official in-person final exam instead. To select the optional online final exam, there will be a quiz to sign up for your preferred exam format. Students who do not complete that exam format selection quiz will be assumed to have selected the in-person official final exam.

7 Course Statements

7.1 Technology
Virtually all students are using their own technology such as smartphones, tablets and computers of various flavours in class and/or for the University of Guelph’s online Learning Management System (aka CourseLink). Society has an increasing level of dependence upon personal technology. Technology glitches are increasingly used as an excuse for not completing online course requirements and for missing course deadlines. However, with so much emphasis placed on online learning, excuses based on technology failure are not sustainable. It is your responsibility to ensure that you can access the course materials and complete online course requirements within the time allotted regardless of technological issues you may encounter. This means you are expected to take reasonable and necessary steps to make your technology work or arrange to access or borrow technology or find an internet connection etc that does work.

If there is a widespread problem and CourseLink is not accessible for a significant period of time (not including scheduled maintenance) deemed by the instructor to have had an impact on students’ abilities to complete quizzes, appropriate accommodations will be given.

If you are connected to a virtual class, you should use the technology to interact with the course in an appropriate manner that respects your fellow students by not creating undue
distractions or interruptions as noted by the university's statement on "netiquette" below.

Also keep in mind that if your technology uses the University's network to access course material, the University's acceptable use policy also comes into play.

7.2 Zoom Recordings

The instructor will record classes using the Zoom recording function. These recordings will be automatically available through the Zoom link on the Courselink site within a day or so after class. The recording also includes a copy of the chat and a transcript of the audio of the presentation. The Zoom video recording of the class will generally have real-time video of the image shown overlaid with the audio of the instructor's comments and may include handwritten comments, other media etc. These Zoom recordings will represent the officially sanctioned recorded media for the lecture and are provided for the convenience of students officially registered in the course and may not be reproduced, or transmitted to others, without the express written consent of the instructor. Note that there may be circumstances in which not all of a lecture is recorded so the recording is an additional aid and not necessarily a replacement for learning the material on your own and through the quizzes and additional media provided.

7.3 Group Work

The weekly quizzes are designed as an experiential learning tool. I encourage you to collaborate and work together on your quizzes to enhance your learning experience. Each of you must submit individual quizzes and you will find with the randomized elements built in to the quizzes that each of you will be doing a slightly different quiz covering the same concepts. The midterm quiz is expected to be an individual effort. The online midterm quiz has a large, randomized bank of questions behind the scenes so each student will have a different midterm quiz.

7.4 Academic Consideration Request

In order to facilitate the process of requesting academic consideration (based on university policies described elsewhere in this outline) and to ensure that you provide sufficient information in making your request, there is a form posted on CourseLink for that purpose. Requests for academic consideration must be done using this form.

7.5 Email Contact

Email is used as an important source of updates about this course. All official email from the instructor will be sent to your University email account (ie the one with @uoguelph.ca). It is expected that you are checking this email account on a frequent basis. If you email the course instructor, please keep in mind that with over 250 students in this course along with virtually all of the University’s business being conducted by email, the instructor receives a lot of email in a day. In order to facilitate an answer to your email, please consider the following guidelines:
correspond with the instructor (mbg3060@uoguelph.ca) using your official University email (@uoguelph.ca). Emails from other addresses (i.e. @gmail.com or @hotmail.com) will be ignored as there is no guarantee who owns the account. By the university’s privacy policy, instructors are not allowed to share your course information with the general public or even family members so we will not reply to non-UofG email addresses since there is no guarantee who the email belongs to.

- if the answer to your email query can be found in the course outline or other material posted on the MBG-3060 CourseLink site, you may not receive a reply or you may just get a link to the relevant information at best.
- include a few relevant key words indicating what your message is about.
- include your full name and student number in the email signature.
- if you are requesting academic consideration, include a copy of the Academic Consideration Request form found on the MBG-3060 CourseLink site.
- allow 24 to 48 hours for a response to your query, especially if you send your message late at night or over the weekend (in other words sending an urgent email expecting a response in a few minutes is not likely to be successful).

7.6 Netiquette

Since we are all sharing the online learning environment in this course from a variety of locations and probably more casual circumstances, there can be a tendency to view the online environment as you might with social media and other more recreational uses. Please keep in mind that online classes and meetings for this course are professional interactions. The following statements about Online Behaviour are provided by the University.

Inappropriate online behaviour will not be tolerated. Examples of inappropriate online behaviour include:

- Posting inflammatory messages about your instructor or fellow students.
- Using obscene or offensive language online.
- Copying or presenting someone else’s work as your own.
- Adapting information from the Internet without using proper citations or references.
- Buying or selling term papers or assignments.
- Posting or selling course materials to course notes websites.
- Having someone else complete your quiz or completing a quiz for/with another student.
- Stating false claims about lost quiz answers or other assignment submissions.
- Threatening or harassing a student or instructor online.
- Discriminating against fellow students, instructors and/or TAs.
- Using the course website to promote profit-driven products or services.
- Attempting to compromise the security or functionality of the learning management system.
8 University Statements

8.1 Email Communication

As per university regulations, all students are required to check their e-mail account regularly: e-mail is the official route of communication between the University and its students.

8.2 When You Cannot Meet a Course Requirement

When you find yourself unable to meet an in-course requirement because of illness or compassionate reasons please advise the course instructor (or designated person, such as a teaching assistant) in writing, with your name, id#, and e-mail contact. The grounds for Academic Consideration are detailed in the Undergraduate and Graduate Calendars.

Undergraduate Calendar - Academic Consideration and Appeals
https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-ac.shtml

Graduate Calendar - Grounds for Academic Consideration
https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/index.shtml

Associate Diploma Calendar - Academic Consideration, Appeals and Petitions
https://www.uoguelph.ca/registrar/calendars/diploma/current/index.shtml

8.3 Drop Date

Students will have until the last day of classes to drop courses without academic penalty. The deadline to drop two-semester courses will be the last day of classes in the second semester. This applies to all students (undergraduate, graduate and diploma) except for Doctor of Veterinary Medicine and Associate Diploma in Veterinary Technology (conventional and alternative delivery) students. The regulations and procedures for course registration are available in their respective Academic Calendars.

Undergraduate Calendar - Dropping Courses
https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-drop.shtml

Graduate Calendar - Registration Changes
https://www.uoguelph.ca/registrar/calendars/graduate/current/genreg/genreg-regregchg.shtml

Associate Diploma Calendar - Dropping Courses
https://www.uoguelph.ca/registrar/calendars/diploma/current/c08/c08-drop.shtml

8.4 Copies of Out-of-class Assignments
Keep paper and/or other reliable back-up copies of all out-of-class assignments: you may be asked to resubmit work at any time.

8.5 Accessibility

The University promotes the full participation of students who experience disabilities in their academic programs. To that end, the provision of academic accommodation is a shared responsibility between the University and the student.

When accommodations are needed, the student is required to first register with Student Accessibility Services (SAS). Documentation to substantiate the existence of a disability is required; however, interim accommodations may be possible while that process is underway.

Accommodations are available for both permanent and temporary disabilities. It should be noted that common illnesses such as a cold or the flu do not constitute a disability.

Use of the SAS Exam Centre requires students to make a booking at least 14 days in advance, and no later than November 1 (fall), March 1 (winter) or July 1 (summer). Similarly, new or changed accommodations for online quizzes, tests and exams must be approved at least a week ahead of time.

For Guelph students, information can be found on the SAS website https://www.uoguelph.ca/sas

For Ridgetown students, information can be found on the Ridgetown SAS website https://www.ridgetownc.com/services/accessibilityservices.cfm

8.6 Academic Integrity

The University of Guelph is committed to upholding the highest standards of academic integrity, and it is the responsibility of all members of the University community-faculty, staff, and students-to be aware of what constitutes academic misconduct and to do as much as possible to prevent academic offences from occurring. University of Guelph students have the responsibility of abiding by the University's policy on academic misconduct regardless of their location of study; faculty, staff, and students have the responsibility of supporting an environment that encourages academic integrity. Students need to remain aware that instructors have access to and the right to use electronic and other means of detection.

Please note: Whether or not a student intended to commit academic misconduct is not relevant for a finding of guilt. Hurried or careless submission of assignments does not excuse students from responsibility for verifying the academic integrity of their work before submitting it. Students who are in any doubt as to whether an action on their part could be construed as an academic offence should consult with a faculty member or faculty advisor.

Undergraduate Calendar - Academic Misconduct
https://www.uoguelph.ca/registrar/calendars/undergraduate/current/c08/c08-amisconduct.shtml

Graduate Calendar - Academic Misconduct
8.7 Recording of Materials

Presentations that are made in relation to course work - including lectures - cannot be recorded or copied without the permission of the presenter, whether the instructor, a student, or guest lecturer. Material recorded with permission is restricted to use for that course unless further permission is granted.

8.8 Resources

The Academic Calendars are the source of information about the University of Guelph’s procedures, policies, and regulations that apply to undergraduate, graduate, and diploma programs.

Academic Calendars
https://www.uoguelph.ca/academics/calendars

8.9 Disclaimer

Please note that the ongoing COVID-19 pandemic may necessitate a revision of the format of course offerings, changes in classroom protocols, and academic schedules. Any such changes will be announced via CourseLink and/or class email.

This includes on-campus scheduling during the semester, mid-terms and final examination schedules. All University-wide decisions will be posted on the COVID-19 website (https://news.uoguelph.ca/2019-novel-coronavirus-information/) and circulated by email.

8.10 Illness

Medical notes will not normally be required for singular instances of academic consideration, although students may be required to provide supporting documentation for multiple missed assessments or when involving a large part of a course (e.g., final exam or major assignment).

8.11 Covid-19 Safety Protocols

For information on current safety protocols, follow these links:

- https://news.uoguelph.ca/return-to-campuses/how-u-of-g-is-preparing-for-your-safe-return/
- https://news.uoguelph.ca/return-to-campuses/spaces/#ClassroomSpaces

Please note, these guidelines may be updated as required in response to evolving University, Public Health or government directives.
